

Trisco Icy Crush

How to Use Trisco Icy Crush Bases

Trisco Foods' Icy Crush Mixtures are most commonly used with a twin bowl mixture. There are two methods of dispensing 'Icy crush' or 'slush' drinks.

- (1) Mix the flavour of your choice into the dispenser bowl with 1 part concentrate to 4 parts water. Then freeze the mixture in your machine.**
- (2) Mix our neutral base in the dispenser bowl with 1 part concentrate to 4 parts water. When the mixture is frozen pour it into a cup and pour over the flavour of choice.**

****Try our Smoothie bases in your machines as well. Simply mix 1 part base to 3 parts water.****
